

ABOUT US

The Fungi

The fungi have a
network like the internet
formed in the ages.
This funky network
was a prehistoric blast.
It was created
here before humans
were dumb pan-troglodytes
trying to live life.
Mycelium was
part of this as well as
our modern day plants,
fungi were the cells
which had a really big heart.
Sharing is caring.
That's how fungi roll.
Their epic network used for
the good of others.
