

ABOUT US

As part of About Us, a team of poets delivered workshops in primary schools in each of the show's locations. The workshops explored the many ways life is connected across the universe. Each class we worked with created a collaborative poem exploring topics like cosmology, nature, identity and the climate. These poems were written by schools in Hull, created with poets Cassandra Parkin, Jay Mitra, Jodie Russi-Red, Joe Hakim, Katherine Horrex and Michael Good.

ABOUT US

Clifton Primary School
poem created with Jay Mitra

Nature

Tree branches swaying like ballerinas
Our tears are like the ocean
You can be friends with nature –
Just be one with nature
Grow up along with nature
Sing like the wind
The trees are important to us
The trees give us oxygen to breathe
Save the rainforest, it is our lungs

Life is a puzzle, and we are a piece of it
We are all unique and the universe would be boring
If we were all the same
We are stars that shine brighter together
If we were never made
The whole universe wouldn't be the same

We are made of our parents' love
We are made of happiness and friendship
We are made of my mum's laugh
We are made of my dad's personality
We are made of brightness
And if you don't believe in yourself
Then neither will anyone else.
Open your wings and fly towards dreams
That can become your future.

ABOUT US

Clifton Primary School
poem created with Jay Mitra

The Bird

My heartbeat is like a drum
In the music of our life
We are part of the universe
We are made of star stuff

There once was a bird that could not fly
But he dug deep down and survived
And carried on with his life.

We are flowers and beauty
The world around us.
Our dreams help us fly
Don't let your dream die.

ABOUT US

Collingwood Primary School
poem created with Jay Mitra

Universal Habitat

The clouds are fluffy like candyfloss
bursting in the sky. Rising ashes are charcoal birds
and the saffron sun burns above us.

Our arms are fawn branches off a flesh and bone tree,
raindrops fell and slowly slipped off our leaves
like bombs falling out of the Luftwaffe.

The waves washed on the saffron sand
with a gentle touch. The scorching sun
tastes like sweat. The cool breeze
swished the grass back
and forth.

Her heartbeat was like thunder
Her hair a tamed forest
Her eyes a meteor.
Play with your hair
Heaven is over our heads
so don't feel despair.
Angel wings are the colour
of white bread and rice.

The ability to fly in the night sky
tastes like freedom.
Looking at the rising
And falling cosmos feels like joy.

Space will always be in our hearts
no matter what we do. The stars
shine bright even in our darkest moments.

ABOUT US

Collingwood Primary School
poem created with Jay Mitra

About Us

I am the ultramarine in the dark sky
The universe is the future, so patience is key
The stars connect us as humans and brighten us up
Like a lantern. The universe is set in my eyes.
When light hits my fawn iris, they turn crimson like mars
I am the shining stars in the sky
And the azure sky is like a nebula
I am the glistening spectacle in the water
The fawn brown bark is just like me
When I was young and climbing a tree
There's violet lightning on our eyelids
Freckles are amber stars on our face and arms
The bruise on our hands is a sunset sky
Life is achieving what your imagination wants you to do
Try to connect your nature with Nature
Or you won't succeed in life
Flowers are the key to paradise.
Heaven is a place we meet our loved ones

ABOUT US

Dorchester Primary School
poem created with Joe Hakim

We Are One

We are the treasure troves of history.
We are the authors of creativity.
We are the authors of excitement
And happiness and
Our souls are our pencils.
Our generation is the future and
Our destiny is our imagination.
Nothing is impossible,
Nothing is out of reach.
Chase shooting stars,
There are no limits in life.
Our hearts shine like LEDs
They will warm you like sunshine.
Minds the size of Jupiter
Beautiful brains like coral in the ocean.
Never give up, be confident and
We can touch the clouds together if we try.
Start small like Mercury
And you will become as big as the Sun.
We are all special
We are one.

ABOUT US

Dorchester Primary School
poem created with Joe Hakim

We All Fit In

It's OK not to fit in
When you were born to stand out.
The Sun is a spoon full of honey,
The moon is like a fluffy cloud and
We are rocks dancing around the Milky Way.
Our brains are jars of memories,
Gravity grounds us to home and
Space is the glue that holds us together.
Our freckles are like stars and
Together our hearts make us one big universe.
We add together like a puzzle,
Whispering like a clock ticking,
We are part of humankind
And we are part of Earth like bricks in a wall.
Blood flowing through us like streams flowing through the earth,
One of many like waves in the ocean, colossal and blue,
Tears as salty as the sea.

ABOUT US

Mountbatten Primary School
poem created with Jodie Russi-Red

We're Connected

We're both connected, you and me
trace back a million years of our family tree
and everything our distant ancestor did is imprinted in us
an echo of a DNA memory
everything they achieved; I feel like I did it too
and since we're all connected, that means, so did you

one time I fought the most scalding fire, dangerous as a difficult maths question,
when you've almost run out of time

one time I crafted the first mighty hammer, as hard as a diamond mine

one time I threw the first spear, faster than a Formula One car

I was the one who discovered Spain, as hot as it was far

one time I created the first motorbike, as pretty as a puppy with puppy-dog eyes

and it was me who harnessed electricity, as shocking as a startling surprise

one time I fired the first deadly arrows, as dangerous as a pack of wolves, hackles
up to fight

years later I built the first racing car, as silver as the full moon at night

I was the person who built the first stone wall, as ancient and as strong as a henge

one time I built a house to live in, and then I rebuilt and rebuilt it again

in another life I wrote your library's very first book, longer than an anaconda snake

another time I created the first chocolate bar, as delicious as a banana cake

and just the other week, I got over my fear and did a jump on my bike

I reached 4000 points on Fortnite

and I climbed Scafell Pike

I did a handstand for 10 seconds straight, and I can do it again

I think that's a pretty big achievement, considering I'm only 10.

ABOUT US

Mountbatten Primary School
poem created with Jodie Russi-Red

About Us

We're both connected, you and me
trace back a million years of our family tree
and everything our distant ancestor did is imprinted in us
an echo of a DNA memory
everything they achieved; i feel like i did it too
and since we're all connected, that means, so did you

in a different age, I could make fire out of stones and sticks
in a different time, I used a rose thorn as a sharp toothpick
I built great things out of stone, in the stone age
and it was me who wrote on the very first page
one time I had a different mother
another time I had a different brother
I once joined the military
and added a thousand new definitions to the dictionary
thousands of years ago i invented chess
I was the world's greatest ever grand master no less
I broke a bone
I broke someone else's bone
I ate meat straight off the bone
one time I swam in the deep, blue sea, alone
it was me who ground down wheat into flour
and it was me who took the first electric power shower
one time I threw a glitter bomb in my friend's face
I travelled 10000 miles, to discover an undiscovered place
one time I popped the first ever balloon, as loud as a Big Bang's roar
one time I fought in a world, wide war
I discovered a fossil
I was a fossil

one time I made my own bed
one time I annoyed my sister
one time I played a game i didn't know how to play

ABOUT US

but that's just me

what's the greatest thing you'll do one day?

ABOUT US

Oldfleet Primary School, Deer Class

poem created with Joe Hakim

Be Yourself

Like a herd of DEER

Like a pack of wolves

Like a school of fish

Like a murder of crows

Like a pride of lions

Connect to who you love.

Love makes a family

Grow together like a garden of flowers.

Be curious, conquer your fears and follow your imagination,

Don't stop until you reach the summit.

Life is short like blades of grass,

But dreams are unlimited.

Be bright and twinkle like the star you are

Until happiness fills the sky.

Be yourself

Be the best you can be

And if you don't succeed at first

Be positive when faced with difficulty

And you will get to the top,

Stand on your toes

Hop and touch the moon.

ABOUT US

Oldfleet Primary School, Polecats Class
poems created with Joe Hakim

A Million Likes

Be kind:

Don't be a bully

Don't be mean and leave a bad taste like mustard.

A smile could change

Someone's day, so

Stretch happiness around the

World like a bungee cord.

Family is the key to happiness,

Friends make you thankful.

Passion is our future,

And like the population

It grows every day.

Like baby-chicks,

Like flowers

In the sun and rain.

Like us.

Everyone is unique

Like our accents,

Our personalities.

We don't give up

And we work as a team

To accomplish our dreams.

We play the game of life

Together and make the

Earth's heart grow

Like a YouTube video with

A million 'Likes'.

ABOUT US

Priory Primary School
poem created with Katherine Horrex

Space Fair

Roll up! Roll up!
Welcome to our planet of moons!

Chips as salty as the sea,
milkshake as frothy as the stars!

Let long streets of ketchup
flow along your tongue.

Roll up! Roll up!
Welcome to our cratered lava plains!

Feel the cold metal of our claw machines,
the deep whoosh of trampolines.
The night's giant megaphone, blasting!

Roll up! Roll up!
Never mind the queues!

Watch rides burst into the sky
like fireworks.

ABOUT US

Priory Primary School

poem created with Katherine Horrex

Homesick Alien

This planet is as boring as disconnected wifi.
Earth. It smells of mud. A matter of life.
I miss my planet with its harmless rainbow lava.
We had to drink it too.
It's springtime here. And what is Spring?
Is it the time of springs? Do humans bounce
with slinkies attached to their shoes?
There are flowers at the roadside,
their petals white as chilled milk.
I walk down this street as heavy as four houses
missing my hoverboard and wanting to eat pasta
all day long. The chocolate chip mountains
where rock cats curl up like crescent moons
and yawn their lives away. Planet Exo123
where you can use rocks as walkie-talkies
and it rains sheets of glass and hot ash.
The highstreets with their shops like midget gems.
Black craters fry and smoulder in sunlight.
Here I can't sleep at night. Wind bangs
on the windows, which is why
they call them wind-ows.
By the time I find my spaceship
it will be covered in leaves
as crunchy as Walkers crisps.
Walkers - they eat them while they walk.

ABOUT US

Rokeby Park Primary School
poem created with Michael Good

We Are All Stars

The glimmering mirror of the stars reflected on the glowing diamond moon.
The sun is an electric star.
The moon is a giant, my connection is to the universe.
Crystal clear galaxies shine bright in the moonlight, atoms create all life, no matter
what you are or who you are.
You are all a shining star, our connection to the universe is great.

The sun is a flaming ball floating in the air, connecting to Earth.
The sun is a flame while Earth is hot and cold.
Burning embers levitated above the atmosphere, catching
Stardust as it oscillates.
How are we related to these astronomical galaxies?
We are all stars and it's crystal clear to me:
Our connection is confusing yet amazing,
Historical yet brand new.
We are all stars.

The galaxy is filled with mechanical birds.
The galaxy is like little fireballs scorching anyone who dares to come near them.
The sun is levitating bright like a burning, boiling ball, blinding the population.

The dazzling sun's brightness is blinding.
The historical stars lit up like a bonfire on New Year's Eve.
The incredible sight of the stars lit up the faces of Earth.
While the stars dance in the sky, a satellite is passing by
The sun, and lights up like a million diamonds.

The sun shone through the moon and lit the galaxy.
Supernovas are incredible.
The flaming arrows around the sun connect Earth to the sky.
While the stars dance in the sky, as crystals pass by,
The hypnotising, gorgeous sun blinded the shimmering, colourful sight of Earth.

ABOUT US

The amazing, delightful, dazzling stars hypnotised people's sight.
Satellites float all around, waving like human beings while stars shine like a
diamond.

My connection is the blindness of the universe,
Little torches scattered around,
Boiling hot like a fire.

The stars are diamonds hanging in the sky: people see them within their eyes.

ABOUT US

St George's Primary School
poem created with Jodie Russi-Red

One Time

We're both connected, you and me
trace back a million years of our family tree
and everything our distant ancestor did is imprinted in us
an echo of a DNA memory
and since they did it, I feel like I did it too
and since we're all connected, that means so did you

one time I could spark a fire with nothing but sticks and stones
another time I made a milkshake, as creamy and thick as snow
one time I began Hull Fair so I could ride all the rides at night
and another time I made the first gun, fast as a flash of light

did you know I carved the world's very first wheel from stone, as if I was helping a
snake shed its skin?
in another life I invented the ps4, and the PS5, and the X Box Series X, and built a
race car, and created paper, and a recycling bin
one time I built a jet that soared through the air like a balloon
then there was the time I built a boat and carried it out to sea to sail for miles and
miles just to discover somewhere new

maybe it was a dream, when I tamed a white mouse, as fluffy as a bubble bath
I was definitely dreaming when I wrote the story about watching a cow jump over
the moon, and then laugh
it was me who once baked the first loaf of bread, as crusty as the earth beneath
the layer of mud
one time I studied for hours and hours, it was as boring as looking for waves in the
wood
one time I helped build an entire village with my own bare hands
and in that village, I built a house, as cosy as a cloud in a candy floss land

I might decide to grow my hair one day, as long as the books by my bed
or else i could design a robot that could design a new, wonderful world, instead

ABOUT US

but do you know that last week I threw a basketball in the hoop, and caught it from
the other side?

I think that's a pretty big achievement

(PS. I'm only ten)

ABOUT US

St George's Primary School

poem created with Jodie Russi-Red

This is About Us

We're both connected, you and me
trace back a million years of our family tree
and everything our distant ancestor did is imprinted in us
an echo of a DNA memory
everything they achieved; I feel like I did it too
and since we're all connected, that means, so did you

the earliest time I remember, I created the very first words
then alone, I climbed a mountain, as high as the birds
one time taught the first parrot to speak out loud
one time I sewed a glittering Cinderella dress, as fluffy as a cotton candy cloud
to cure my boredom, I thought up WiFi, and laptops, phones, the Xbox and games
I created all the book characters and gave them names
I baked the first cupcakes that were as fluffy as my teddy bear
there was a time I invented the internet, but now everyone's just mean on there
there was the time I competed in the Olympics, which was as scary as a dark
 nightmare
I tamed the first wolf until my hands had scratches and wounds everywhere
as sonic as a hedgehog, I made the first electric sound waves
did I tell you about the time I had a pet dinosaur, as cute as a puppy with a waggly
 tail?
did I tell you about the time I lifted Excalibur from the stone with everyone chanting
 my name?
or the time I scored the winning goal in the first World Cup football game?
don't forget that it was me who thwarted Napoleon in the Battle of Waterloo
but before that, as boring as a spelling test, I set-up the first school, too
but in this year alone, I got revenge on my bully, I even won Man of the Match
I earned a taking part medal in a race that I came last

I feel kinda' proud of myself,
so much so that I'm glowing
imagine what I'll achieve
once I really get going

ABOUT US

Stoneferry Primary School
poem created with Michael Good

Connections

My connection is: we have the invisible chain keeping us on the ground called gravity.

My connection is watching the stars dance across the sky.

Connections are made by constellations that create bright light in the night.

I am connected by technology that we see, look at, and use every day to give us answers.

My connections are stars holding hands and galloping through galaxies.

My connections are the linked stars in the sky,

The Moon to the tides.

Connections are oxygen to help us breathe,

Invisible chains on the ground called gravity.

I'm connected to the universe through gravity,

Which is like invisible chains, pulling us down.

My connection is the sun's brightness.

We are connected to the universe through the moon's darkness.

My connection is the unstoppable constellation in the creamy night sky.

My connection is the floating, shiny satellite.

My connection is the linked stars called constellations.

Connections are made in seconds, like when a star dies and another is born.

We are all connections to the Earth and solar system.

We connect to all matter of space and the planets, because this is us!

ABOUT US

The Parks Academy

poem created with Cassandra Parkin

Something you should know about me

I can fly to the sky, very high

I am as super-fast as a cheetah

I am Lionel Messi

I am a dog with confidence

I can fly with red wings

I can be invisible when I want to

I am the best striker in the world

I can fly to the moon and see the pretty stars of the night

I have laser eyes

I can turn into a dragon and take the solar system

I can talk to animals

I can walk on water

I can talk to horses

I can heal animals

I can make myself invisible before I touch the stars

I can become a fox

I can turn into any extinct or alive animal

I can turn into a dinosaur

ABOUT US

The Parks Academy
poem created with Cassandra Parkin

I Was Born in a Star

I was born in a star, and I felt curious

Why am I born in this thing?

I don't know!

What do you mean?

I was born in a star, and it felt like I was born in a diamond

I felt confused

Why were we born in stars?

We were born in stars because no humans were alive then really

I was born in a star, and it felt special, crazy, creepy

I felt very sleepy

Was it hot?

Nope

But get ready – the future is upon us

I was born in a star, and it felt blinding and I felt curious

What did it feel like up in the sky?

So crazy, so creepy, mysterious

I feel crazy, mysterious and weird

I was born in a star and it felt all warm and sparkly

I felt joyful and excited

Was it very hot?

Yes, it was quite hot, and the star was my home

I was born in a star, and I felt hot

What did it feel like inside of the star?

Very scary and weird!

It was awesome, man

I was born in a star, and it felt like laying on a soft bed

I felt very scared and frightened

ABOUT US

Why was I born in this weird shaped shiny thing?

Because I just was born in it

I love laying in my soft bed

I was born in a star, and it felt strong but magnificent

I felt confused and terrified

Was it fun?

Nope – it wasn't fun

I was born in a star and it felt like a fizzy drink and hot lava

I felt happy and amazing

How did it happen?

I don't know

I was born in a star and it felt like sparkly rain

I felt I was being terminated

How does it feel for you in a star?

It feels good – it's cool being in a star

I was born in a star and it felt like I was on the beach

I felt like I was in a void

What happened to you when the sun came up?

Nothing mysterious

I was born in a star, and it felt like I was on the sun

I felt happy

Did it feel like dying?

Being in a star high-above was awesome

I was born in a star and it was warm

I felt very nervous and sick

How did it feel when you were born in a star?

It felt amazing

But the future is upon us now

I was born in a star and it felt horrifying –

Just like a hot bath

Where am I? How good was your journey?

ABOUT US

This is the end of the story

I was born in a star, and it felt like the sun was burning my skin

Why were we born in a star?

Because there is the same amount of humans as stars

Oh my, I'm leaving –

See you whenever!

ABOUT US

The Parks Academy

poem created with Cassandra Parkin

Something you should know about me

I can roar like a tiger at night
I can touch the glistening stars
I can run like a flash in the light
I can back flip off my shed
I can manipulate time
I can move stuff around with my mind
I can freeze time by looking through black eyes
I can teleport to different places
I can fly
I can reverse time
I can turn into a blob of jelly
I can turn invisible
I am a vampire
I sleep in the day and wake at night
I have supersonic hearing
I can walk through things
I can teleport
I can grow things

ABOUT US

The Parks Academy
poem created with Cassandra Parkin

I Was Born in a Star

I was born in a star, and it felt wonderful

What do you want?

I want to know how this happened.

I could see beautiful stars in the sky

It was so bright it was incredible

I was born in a star and I felt happy

What is your name?

My name is a secret –

But I am called Summer

I was born in a star, and it felt exciting.

What was it like?

It was scary, not nice

I could see a very, very, VERY shiny light shine in my eyes. I felt like something was
being pressed on my eyes

The stars shine so bright. It's what makes us beautiful, and what makes us, us

I was born in a star, and it felt oddly relaxing

Was it wonderful?

Yes, because it was so nice and so weird

I could see people shining and light coming

What did it feel like to be a star?

I was born in a star, and it felt like something spectacular

What did it feel like?

It felt relaxing, and calm

You might see me shine

I'm glad that I'm out of the star

I was born in a star, and it felt magical

How did you get in the magical star?

We just grew in it.

ABOUT US

I could see the Earth, and space
What stuff did you do in the star?
I just played, okay?

I was born in a star, and it felt like shooting out of the star
What happened?
We were born just inside and then we came out
I could see lots of light
The best detail of my life

I was born in a star, and it felt new and difficult
What do you feel like?
I'm feeling happy
I can see lots of countries, and the moon

I was born in a star, and it felt like I was a shooting star
How is that possible?
Because we are all born out of stars
I'm special, a different breed because I could see other stars and I was in this big
black area

I was born in a star, and it felt amazing
What date was it?
The 23rd of September
I could see a lot of light when it was daytime
I was born in a black area called space

I was born in a star, and it felt honouring
I could see something glowing
Bright, shiny, and new

I was born in a star, and it felt magical
How does it feel, being a star in the sky? And why are the stars so small?
They aren't small, they are huge
It seems small because they are far away
I saw a big light coming towards me and it was very scary but very exciting

I was born in a star, and it felt like a big bomb

ABOUT US

How did we come out?

We broke out of it like an egg

I could see galaxies

And then I fell down to Earth

I was born in a star, and I felt special

Why were you born in a star?

Because we all were

It was nice in the star – it was calm and beautiful

I was born in a star, and it felt amazing

How is that possible?

You get just a day there

I could see the moon and all the other stars

I was scared

I was born in a star, and it felt a bit weird to hear that

How did you all get out of the star?

We got flung out and jumped – it was awesome

It felt like I was in Heaven

It's the best – I wish I was like a star

ABOUT US

Wansbeck Primary School
poem created with Cassandra Parkin

Something you should know about me

When I go to sleep, I could touch the moon

We are monkeys swinging through the night, wondering where we will go next

I am able to shape-shift

I am a wolf as I howl at my brother

I am scary by being quiet

I can fly and go to Mars and Jupiter

When I am sleeping, I visit my Great Grandma in Heaven, where we are angels and
roam around together

I know what everybody's thinking about when I am in the same room

I can stroke the wolves as I sleep

I am like a buzzy bee – I sting you when you are in my way

I am secretly a lion

I am the sign of the fish

ABOUT US

Wansbeck Primary School
poem created with Cassandra Parkin

I Was Born In A Star

I was born in a star, and it felt weird

How did they make us?

God did it

No wonder we were made out of stars

I was born in a star, and it felt got when I was in the star

What happened there? What did we do?

We just made ourselves from eggs to humans

I feel proud. No wonder we are from the sky

I was born in a star, and it felt weird, but ordinary

Were you in the same star as me?

Yes!

It was a good feeling – we are all stars

I was born in a star, and it was hot and scary

When were we made in stars?

Billions of years ago – that's why we are here!

I feel good and strange now I know I was born in a star

I was born in a star, and it felt hot and really fast

How does it feel to be in a star?

It feels really hot

How, how unordinary!

Are you speechless?

I was born in a star, and it felt hot and bright

How did you get out? Was it weird?

The star dissolved, and yes – it felt like goo

It makes me feel wild and confused

Don't worry, at least you exist

I was born in a star

ABOUT US

I was really warm and sticky, it was really yellow and bright and blinding

Why did we go to a star?

To get developed, and go down

That's why we exist

I was born in a star, and it felt warm and cosy

How did you get out? Was it weird?

I got out by digging a hole, and yes, it was very weird

It is a good feeling to come out of a star

Can more than one person be in a star?

I was born in a star, and it felt warm –

But not the cuddly warm, it was like boiling water on a stove warm

Was it weird?

Yes, it was weird

It's exciting to be born in a star.

How did we get out?

I was born in a star, and it was cosy when I was in the star

How did it happen?

It just did

I feel a confusing feeling in my knees, it's like a shiver, it makes my blood go cold –

I am speechless that we were born in a star

I was born in a star, and it was magical and sparkly

How are stars made?

They are made out of stardust and the moon

I feel strange and weird

No wonder we were made out of stars

I was born in a star, and it was exciting

Can more than one person be in a star?

Yes – I was lucky, though

What does the star do to make us?

I was born in a star, and it changed my life

Was it warm? How did you get out?

The star cracked

ABOUT US

I felt a bit weird

No wonder we were born in stars because we all are still stars

ABOUT US

Wansbeck Primary School
poem created with Cassandra Parkin

Something you should know about me

I can transform into animals
I can turn into a rock to get away from the darkness
I make dreams happen
I can fly a jet
I can turn into a pizza
I can turn into a burrito
I can turn into a burger
I can turn into anything
I can hear anything
I can fly
I can be invisible, and run to Spain
I can fly to the moon and back
I wish I could fly, high, high, and touch the sky
I can get any superpower I think of with one bang of my staff
I can talk to animals and understand them
If I was a shapeshifter, I would be a dragon soaring through the night sky
Or the kraken where the water would be my home
I could be anything, anytime, anywhere
I can turn into a dog
I can change gears on my body to go faster
When I close my eyes, time freezes
I can turn into a Fennec Fox
I can turn into a donkey
I can turn into a fish
I can turn into an ice fairy
I can control the country

ABOUT US

Wansbeck Primary School
poem created with Cassandra Parkin

I Was Born in a Star

I was born in a star, and it felt amazing – I will never forget it
How did you feel, being born in a star?

I felt really strange!

It was petrifying

I was born in a star, and it felt strange and exciting
Are you mad?

I am not mad, I'm just confused

I was born in a star, and it was feeling terrified as it was shaking
I didn't think I was strong enough
How did it feel to be born in a star?
It was scary and weird – confusing

I was born in a star, and it felt weird, it was confusing
Were you scared?

Yes, I was

It was terrifying

I was born in a star, and it felt good
What were you feeling in the star?
It felt amazing – it was exciting and strange

I was born in a star, and it felt good
Did you like it?
I loved it so much...were you born in a star too?

I was born in a star...you get scared, then your brain gets wiped
What was it like?
I hated it!

I was born in a star, and it felt nice
I reached the universe
After so long, I was born
How were you born in a star?
The magic of life
